

MAKING DRY ICE HAS NEVER BEEN EASIER!

ASCO's state-of-the-art automatic Dry Ice Machine BP407-S7 produces 10 different slice thicknesses and 2 different types of pellets at the press of a button.

Airline catering (20-25 mm thickness), transport cooling (thicker blocks) or pellets for other cooling or for dry ice blasting purposes: The Automatic Dry Ice Machine BP407-S7 produces high quality dry ice blocks, slices and pellets to cover all different market requests.

The dies for the production of different sizes of dry ice do not have to be changed manually as they are already built in and can be controlled at the touch screen panel. Depending on the setting the production capacity of the BP407-S7 ranges from 220 to 400 kg/h.

Pellet Sizes:

- 3 mm (blasting purposes)
- 6, 10, 16 mm (cooling purposes)

Block / slice sizes:

Catering Purposes

210 x 125 mm
Thickness: 20, 21, 22, 25, 27, 30, 35, 40, 50 or 60 mm
(other dimensions on request)

WRAP YOUR DRY ICE SLICES

ASCO's automatic Dry Ice Machine BP407-S7 (or other dry ice machines) can be combined with an Automatic Wrapping Machine.

ASCOCO's Automatic Wrapping Machine APM50 is specially designed for wrapping dry ice slices and/or blocks with a standard size of up to 210 mm x 125 mm and 20-22 mm thickness. Wrapped dry ice slices/dry ice blocks are used for airline catering and food cooling purposes.
